DETAILED ACTION

Priority

1. The first sentence of the specification states that "This application is a divisional of U.S. Patent Application Serial No. 10/230, 353 filed August 29, 2002. which is incorporated herein by reference in its entirety.

The instant application takes priority from DE 10142659.3, filed August 31, 2001. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file of the parent application which is 10/230,353.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art including CA:88:190435, CA:54:50305, CA:55:124710, CA:76:85045, US 6,717,008 and US 6,670,401, teach various sulfoxide indanol derivatives.

CA:88:190435 teaches indanol sulfoxides but R8, R6 are hydrogens which is not found in the instant invention.

CA:54:50305 teaches an unsubstituted naphthylsulfinyl indanol.

CA:55:124710 teaches a series of various sulfoxy indanols but R8, and R6 are always hydrogen.

CA:76:85045 teaches stereospecific isomers of sulfoxy indanols but R8 and R6 are always hydrogen.

Art Unit: 1621

US 6,670,401 teaches the compounds of the instant invention but the claims are not double patenting and the application is not available under 102 since the inventive entity is the same.

US 6,717,008 teaches compounds similar to the instant invention used for weight reduction. However R8 and R6 are hydrogens and there is no motivation to modify the hydrogens.

The prior art does not anticipate or suggest the instant invention being claimed.
